

ELECTRICAL PANEL BUILDERS

THE COMPANY

Cedac Ireland is an electrical panel builder for commercial and industrial companies. The company specialises in designing, manufacturing, installing and testing

- Control Panels;
- Power Distribution Boards;
- ESB Metering Cabinets;
- Motor Control Centres.

The loyal customer base chooses Cedac Ireland because quality workmanship is consistently delivered, on time and on budget.

SERVICES

With over 20 years experience, the Cedac team is qualified to design, build and test bespoke systems to meet clients needs.

Services include:

- Design of the entire circuit or simply the boards hardware and layout;
- Building all combinations of ESB approved whole current and c/t metering panels;
- Building panels with manual or PLC controls;
- Design of bespoke systems for mechanical engineering products;
- Supply a range of power factor control systems;
- Maintenance.

Cedac is an approved panel builder for the Logstrup Form 4 cubicle range and a preferred supplier of Schneider Electric components so clients have the flexibility to expand or modify the system as their requirements change.

WHY CEDAC IRELAND?

Cedac Ireland has all the key ingredients customers look for in an electrical panel and system builder:

- Quality workmanship;
- Use of leading quality components including Schneider Electric, ABB and Rittal;
- Fast and reliable manufacturing and installation;
- Over 20 years experience in the industry;
- Competitive prices.
